Late Prenatal Care refers to mothers who do not receive prenatal care during the first trimester of pregnancy.

Low Birth Weight represents live-born infants weighing less than 2,500 grams at birth.

Infant Mortality is defined as infant deaths per 1,000 live births.

Rates should not be calculated when the frequency of deaths is less than 20 events. These death rates are very unstable.

Bexar County Health Collaborative uses these sectors as a method for its analyses. San Antonio Metropolitan Health District is providing this data in support.<http://www.healthcollaborative.net/>
